

Ali Bel Haj Letaif

Software Engineering Student – Cloud & Distributed Systems

+216 95 374 008 • belhajla@mail.gvsu.edu • LinkedIn • GitHub: alibhl • Tunis, Tunisia

Professional Profile

Software engineering student specializing in cloud-native platforms, distributed systems, and DevOps automation. Strong experience in backend development, microservices architecture, and scalable infrastructure. Admitted to the Master of Science in Software Engineering at Grand Valley State University and seeking a **Graduate Assistantship** to contribute to teaching, research, and engineering laboratories.

Technical Skills

Programming: Java • Python • JavaScript • TypeScript • C • C++ • C# • SQL • Bash

Frameworks: Spring Boot • Angular • Node.js • Hibernate/JPA • REST APIs

Software Engineering: OOP • Design Patterns • Microservices • MVC • Clean Architecture • Agile/Scrum • Git

Cloud & DevOps: Docker • Kubernetes • Azure • AWS • OpenStack • Terraform • Ansible • GitLab CI/CD • ArgoCD

Observability: Prometheus • Grafana • ELK Stack

Systems: Linux • TCP/IP Networking • Distributed Systems

Education

Engineering Degree – Cloud Engineering 2023 – Present

ESPRIT – Private Higher School of Engineering and Technology, Tunis

Relevant Coursework: Distributed Systems, Cloud Computing, Software Architecture, DevOps Engineering

Bachelor's Degree – Computer Systems 2021 – 2023

ISI Mahdia – IoT & Embedded Systems

Professional Experience

End-of-Studies Internship – SRE Platform Engineering 2026 – Present

EXCELLIA Solutions, Tunis

- Designed an SRE platform for hybrid containerized environments deployed on Azure
- Automated infrastructure provisioning using Terraform and Ansible
- Implemented CI/CD pipelines and GitOps deployment using GitLab CI and ArgoCD
- Integrated monitoring and observability using Prometheus, Grafana, and ELK Stack

Intern – Containerization & CI/CD 2025

Attijari Bank, Tunis

- Containerized full-stack application (Spring Boot + Angular) using Docker and Kubernetes
- Designed automated CI/CD pipelines using GitLab
- Implemented GitOps workflow for automated deployments

Intern – Networking & Security 2024

Kleos, Tunis

- Assisted in network infrastructure management and Fortinet firewall configuration

Academic Project

Private Cloud Infrastructure – OpenStack & Kubernetes 2025

- Automated deployment of OpenStack private cloud using Ansible
- Designed high-availability Kubernetes cluster with auto-scaling
- Deployed microservices-based application

Certifications

AWS Academy Cloud Operations (2025)

Introduction to Kubernetes – Linux Foundation (2024)

Research & Academic Interests

Cloud Computing • Distributed Systems • DevOps • Site Reliability Engineering • Scalable Software Architecture

Languages

Arabic (Native) • English (B2) • French (B2)
